DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-39 remain rejected Ordish (US 5,195,031) in view of Applicant declaration, PRNewswire "Reuters Launches Dealing 3000", Jan 19, 2000, New York (hereinafter PRNewswire).

Re. Claims 1, 16, 22, 36-37, and 39 Ordish substantially discloses conversational trading system for providing real time context sensitive trading messages (tickets) based on conversation analysis [see entire document particularly Abstract; figures; C1 L31 to C3 L33; C5 L25 to C7 L2; C8 L42 to C11 L17; C13 L1-L67; C25 L37 to C27 L10 and claims], Applicant admits that a conversational dealing system Reuters 2000/1 exist for a single instrument (see page 1 lines 20-29 of specification) and PRNewswire discloses launching of Dealing 3000 with total of 26 conversations dealing of currencies [see entire document]. Further Ordish discloses a deal stack holding a plurality of deals in which the trader is participating, the deal stack including the status of each deal and a deal description [Figures 4-6; C25 L37 to C27 L10], means for entering conversational deal related information [C6 L65 to C7 L2; C25 L37-L67], a parser for parsing the conversational deal related information to detect a change in or an intention to change

Art Unit: 3628

deal status; and for notifying the deal stack of the change in deal status [C8 L42 to C11 L17], whereby on receipt of a changed deal status notification, the deal stack generates deal string appropriate to the new deal status [C8 L40-L50; C9 45 to C10 14; C19 L1 to C20 L10] to provide an enhance system and make plurality of conversational possible per keystation (terminal or direct deal entering mean) with greater benefit to trader. It would have been obvious to one of ordinary skill in the art at the time the Applicant's invention was made to combine disclosures Ordish, applicant and PRNewswire to provide a system to handle multiple trade conversation possible to traders.

Re. Claims 2-6, Ordish further discloses wherein the parser is deal status dependent, whereby the parser parses conversation input by the trader to detect in the conversation a predetermined content related to the deal status, wherein the system analyses the parsed deal status information provided by the parser to detect the presence of a plurality of predetermined deal variables, wherein a deal is initiated by a taker and the parser to parses conversation input into the system by the deal maker and deal taker, wherein, in the absence of any deal related information in the parsed conversation, the parser monitors the conversation for a request for a quote (RFQ), wherein the parser has a list of terms pertinent to each deal stage for a given instrument and, on detection of a term in the list for a given deal stage, parses the terms and variables in the conversation [Figures 3-4, 28; C8 L42 to C11 L17; C13 L1-L67].

Re. Claims 7-9 Ordish further discloses further comprising means for inputting non conversational deal related information, wherein the means for inputting non-conversational deal related information comprises deal status dependent buttons on the deal stack, and wherein the means for inputting non-conversational deal related information comprises a plurality of deal status dependent keyboard driven menus [Abstract; Figures 1, 28; C1 L31 to C3 L33; C6 L65 to C7 L2; C25 L37-L67; claim 12].

Re. Claims 10-13 Ordish discloses wherein the means for entering conversational deal related information comprises a conversation panel in the user interface, wherein deal related information input into the system via means for inputting non-conversational deal related information is converted into conversation and entered into the conversation, wherein each deal in the deal stack has an associated conversation, and wherein the trader terminal further includes a messaging system for sending deal related messages to the dealing system when the status of a deal in the deal stack changes, the messages sent being dependent on the status of the deal [Figures 1-2; C1 L31 to C3 L33; C6 L65 to C7 L2; C13 L1-L67; claim 1].

Re. Claims 14-15 Ordish further discloses wherein the instruments include at least one financial instrument (spot type deal) and wherein the at least one financial instrument is a foreign exchange (currency) [Figures 4, 23; C13 L1 to C14 L57].

Art Unit: 3628

Re. Claims 19-21 Ordish discloses wherein each deal status has an associated deal string [Figures 4-6; C10 L15-L63], further comprising non-conversational means for the trader to input deal status changes into the trading system and wherein the non-conversational means for entering deal status changes includes a plurality of deal status dependent buttons on the deal stack [C1 L31 to C3 L33; C6 L65 to C7 L2; C25 L37-L67].

Re. Claims 17-18 Ordish further discloses wherein the parser monitors the conversation in the conversation panel for predetermined terms dependent on the deal status [C8 L42 to C11 L17; C13 L1-L67; C25 L37 to C27 L10], and wherein the parser comprises a list of deal statuses and associated terms indicating a change of status [Figures 4-6; C25 L37 to C27 L10].

Re. Claim 23 Ordish discloses wherein the parser is deal status dependent, whereby the parser parses conversation input by the trader to detect in the conversation a predetermined content related to the deal status [C6 L65 to C7 L2; C8 L42 to C11 L17; C25 L37-L67].

Re. Claim 24 Ordish discloses wherein the system analyses the parsed deal status information provided by the parser to detect the presence of a plurality of predetermined deal variables [C8 L42 to C11 L17; C13 L1-L67; C25 L37 to C27 L10].

Re. Claims 25-27 Ordish discloses wherein a deal is initiated by a taker and the parser parses conversation input into the system by the deal maker and wherein, in the absence of any deal related information in the parsed conversation, the parser monitors the conversation for a request for a quote (RFQ) and wherein the parser has a list of terms pertinent to each deal stage for a given instrument and, on detection of a term in the list for a given deal stage, parses the terms and variables in the conversation [Figures 3-6, 9-10; C8 L42 to C11 L17; C13 L1-L67].

Re. Claims 28-31, Ordish further discloses means for inputting non-conversational deal related information, wherein the means for inputting non-conversational deal related information comprises deal status dependent buttons on the deal stack, wherein the means for inputting non-conversational deal related information comprises a plurality of deal status dependent keyboard driven menus, and wherein the means for entering conversational deal related information comprises a conversation panel in the user interface [Abstract; Figures 1, 28; C1 L31 to C3 L33; C6 L65 to C7 L2; C25 L37-L67; claims 1&12].

Re. Claims 32-33, Ordish further discloses wherein each deal in the deal stack has an associated conversation, and a messaging system for sending deal related messages to the dealing system when the status of a deal in the deal stack changes, the messages sent being dependent on the status of the deal [C1 L31 to C3 L33; C6 L65 to C7 L2; C13 L1-L67; claim 1].

Re. Claims 34-35 Ordish further discloses wherein the instruments include at least one financial instrument, and wherein the at least one financial instrument is a foreign exchange (FX) instrument [Figures 4, 23].

Re. Claim 38, Ordish further discloses wherein the means for entering deal related information into the system comprises keyboard driven menus [C1 L31 to C3 L33; C6 L65 to C7 L2; C25 L37-L67; claim 12].

Response to Arguments

1. Applicant's arguments filed June 16, 2005 have been fully considered but they are not persuasive.

In response to applicant remark that Ordish does not teach or suggest parsing to detect changes in or intended changes in deal status. Ordish discloses detecting inconsistencies in conversation and analyzing the conversation or dealing dialogue, parsing trading conversation for automatically extracting trading textual data for providing said messages [see entire document particularly, col. 2 lines 39-54; col. 5 lines 39-65; col. 12 lines 23-31; col. 26 lines 32-55; col. 563 lines 1-55 and col. 8 line 43 to col. 11 line 17].

Conclusion

2. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
